

MARCO TURATO

E-mail Address: marcoturato@outlook.it

Linkedin Profile: www.linkedin.com/in/marco-turato

Portfolio: bit.ly/marcoturato

Motivated Mechatronics Engineering student, about to graduate, with a strong systems-thinking mindset and hands-on experience in industrial automation, system integration, and multi-domain modeling. Skilled in bridging mechanical, electrical, and software disciplines to develop and optimize complex systems. Proven track record of delivering practical projects, from robotic programming and hydraulic system control to mechanical design and 3D printing. Proactive, collaborative, and eager to contribute as a Systems Engineer in a dynamic, cross-functional environment.

Projects and experience

University of Trento

Trento, IT

- Currently working on my Master Thesis "Parallelization of Power Take-off systems for point absorber wave energy converters" in collaboration with NTNU (Trondheim).
- Winner of "Best Project Award" in the FEM course with the FEA of the 5 MW Reference Wind Turbine (for Offshore System Development) blade.
- Energy evaluation of the offshore DTU 10 MW wind turbine (including PMSG model) on Simulink (MATLAB), performing both static and dynamic analysis.
- Wind farm SCADA controller model for improving maintenance planning and energy requirements from the grid (on Simulink).
- Hydraulic circuit modelling of a VOLVO excavator arm in Simulink as a group project.
- Modelling and energy analysis of a commercial PV module (100 W) equipped with an uniaxial tracking system.
- Mechanical design of a sweeper robot in team collaboration, from concept selection to the final 3D assembly.
- Project on the realization of a displacement de-multiplier using flexures hinges in which QFD map, Pugh matrix, TRIZ method and belief map has been applied.

LUT University

Lappeenranta, FI

- Simulink modelling of a hydraulic workshop crane with PID controller, then tested in a real prototype.
- Programmed an anthropomorphic welding robot (Yaskawa) for automated manufacturing of an automotive component.
- Designed and 3D-printed an innovative lightweight gear-shift knob.

Education

University of Trento

Trento, IT

Enrolled in Master of Mechatronics Engineering

Sep 2024-Now

- Focus: industrial robotics, mechanics, renewable energy conversion systems, statistics, system design, intelligent distributed systems, FEM analysis, simulation of multi-domain complex systems.

Lodz University of Technology

Online

ECIU micro-module "Ditch it or pitch it"

Nov 2025-Feb 2026

- Grade: 5/5.
- Focus: communication and presentation techniques.

LUT University

Exchange semester

Lappeenranta, FI
Jan 2025-May 2025

- Average grade: 4.68/5.
- Focus: System modelling, welding automation, machine dynamics, laser, optics and AM systems, simulation, control of mechatronics machines.

University of Trento

Bachelor of Industrial Engineering

Trento, IT
Sep 2021-Sep 2024

- GPA: 104/110 (Top 10% of class).
- Thesis on failure analysis of a bolt used in naval field due to fatigue and corrosion, performing SEM analysis.
- Focus: Controls, materials, measurements.

ITIS A. Rossi

Technical secondary school in Mechatronics

Vicenza, IT
Sep 2016-Jul 2021

- GPA: 100/100.
- Final project on design of a jib crane, from the mechanical structure design to PLC control.
- Focus: 3D modelling, coding, mechanics and energy systems.

Skills

- Mindset: adaptable, collaborative, detail oriented, proactive and solution-oriented.
- Effective technical communication and presentation skills (certified by Lodz University of Technology)
- Software: ROS2, Ubuntu (Linux), Visual Components, AutoCAD, SolidWorks, Inventor, Ansys, MATLAB, Adams, Delta COMMGR.
- Programming: C++, R, Python, Mathematica.
- Languages: English (B2), Italian (C2), currently learning German.
- Hobbies: hiking, photography, second-hand school book sharing volunteer, scouting.
- Driving license

EU Citizen (Italian citizenship) - Available for international internships

I hereby give consent for my personal data included in this CV to be processed for recruitment purposes, in accordance with the Regulation of the European Parliament 679/2016 (GDPR).
